

Reports Pack

Generated 2026-07-17 · Base currency SGD

Figures use today's FX rates where a conversion is needed (approximate — not for filing). This is a consolidated report of facts you already have — reporting only, not tax or financial advice, and never a recommendation.

CONSOLIDATED

Net worth trend

As of	Net worth	Assets	Liabilities
2026-05-01	725,996.00	1,109,036.00	383,040.00
2026-05-08	732,364.00	1,118,764.00	386,400.00
2026-05-15	738,732.00	1,128,492.00	389,760.00
2026-05-22	745,101.00	1,138,221.00	393,120.00
2026-05-29	751,469.00	1,147,949.00	396,480.00
2026-06-05	757,838.00	1,157,678.00	399,840.00
2026-06-12	764,206.00	1,167,406.00	403,200.00
2026-06-19	770,574.00	1,177,134.00	406,560.00
2026-06-26	776,943.00	1,186,863.00	409,920.00
2026-07-03	783,311.00	1,196,591.00	413,280.00
2026-07-10	789,679.00	1,206,319.00	416,640.00
2026-07-17	796,048.00	1,216,048.00	420,000.00

Change over the recorded period: +159,210.00 (26 snapshots).

Reporting only, not advice.

Review

As of 2026-07-17

Data	Review	1 holding is low-confidence — review sourcing
Liquidity	Review	Liquid share is 9.9% of assets
Insurance	Review	Insurance 'Critical Illness' renewal is overdue (2026-07-09)
Insurance	Review	Insurance 'IntegratedShield' renewal due in 12 days (2026-07-29)
Insurance	Review	Insurance 'Motor (private car)' renewal due in 25 days (2026-08-11)
Estate	Review	2 key documents marked missing or outdated
Estate	Review	Estate review due in 20 days
Data	Info	4 holdings have incomplete details

Items to review — reporting only, not advice or a required action.

Cash flow

No obligations, goals, or contributions recorded — nothing to project.

Known future cash flows you've entered; outflow total uses today's FX (approximate). Not advice.

Scenarios

Net worth	796,047.87
Exposure	Value
Equities	51,853.05
Crypto	13,244.82
Property	980,000.00
Foreign-currency	56,891.87
Scenario	Modelled net worth
Equities fall 10%	790,862.57
Equities fall 20%	785,677.26
Equities fall 30%	780,491.96
Risk assets fall 20% (equities + crypto)	783,028.30
Crypto falls 50%	789,425.46
Property falls 10%	698,047.87
Your foreign currencies weaken 10% vs base	790,358.68
Scenario, not forecast — arithmetic on today's values, not a prediction, probability or recommendation. Real outcomes will differ.	

PER-ENTITY

Per-entity — Household

Net worth

Total value	739,156.00
Cost basis	656,605.00
Unrealised P/L	+82,551.00
Today's change	+47.80

Reporting only, not advice.

Policy drift

No policy targets set for this entity — nothing to measure drift against.

Reporting only — distance from your own targets. Not financial advice.

Realised P/L — 2024

No realised events recorded for 2024.

Organisation & reporting only — NOT tax advice. Gains are in each instrument's native currency; the current-FX base total uses TODAY's FX (approximate — not for filing). The trade-date-FX base total instead values each leg at the FX rate stored when the trade was recorded, and omits any trade lacking a stored rate. Short/long term is a neutral holding-period split at your chosen threshold, not a tax ruling. Verify against your broker records and your jurisdiction's rules.

Risk

Beta (vs SPY)	-0.3559
Correlation	-0.3547
Downside deviation	7.5
Concentration (HHI)	0.721

Reporting only, not advice.

Attribution

Headline return **+12.57%**

Asset class	Contribution
Bond	+0.07%
Cash	0.00%
Equity	+0.24%
Fixed deposit	+0.08%
Liability	0.00%
Property	+12.18%
Retirement	0.00%

Residual (income, realised, closed positions): 0.00%

Descriptive decomposition — not advice. A single-period, price-based approximation: each holding's contribution is its weight × its return on cost. Income, realised gains, and positions closed during the period are not attributed per-holding; they are surfaced together as an explicit residual, so the contributions plus the residual equal the total return exactly (nothing is dropped). Multi-period (Brinson) attribution is deferred.

Per-entity — Meera Iyer

Net worth

No holdings recorded for this entity.

Reporting only, not advice.

Policy drift

No policy targets set for this entity — nothing to measure drift against.

Reporting only — distance from your own targets. Not financial advice.

Realised P/L — 2024

No realised events recorded for 2024.

Organisation & reporting only — NOT tax advice. Gains are in each instrument's native currency; the current-FX base total uses TODAY's FX (approximate — not for filing). The trade-date-FX base total instead values each leg at the FX rate stored when the trade was recorded, and omits any trade lacking a stored rate. Short/long term is a neutral holding-period split at your chosen threshold, not a tax ruling. Verify against your broker records and your jurisdiction's rules.

Risk

Risk metrics unavailable — not enough valued holdings or price history in the window to compute them.

Reporting only, not advice.

Attribution

insufficient cost basis to attribute a return

Descriptive decomposition — not advice. A single-period, price-based approximation: each holding's contribution is its weight $\times$ its return on cost. Income, realised gains, and positions closed during the period are not attributed per-holding; they are surfaced together as an explicit residual, so the contributions plus the residual equal the total return exactly (nothing is dropped). Multi-period (Brinson) attribution is deferred.

Per-entity — Rajan Family Trust

Net worth

Total value	56,891.87
Cost basis	36,490.94
Unrealised P/L	+20,400.94
Today's change	-136.72

Reporting only, not advice.

Policy drift

No policy targets set for this entity — nothing to measure drift against.

Reporting only — distance from your own targets. Not financial advice.

Realised P/L — 2024

Currency	Realised	Short term	Long term
USD	+598.50	0.00	598.50

Base total (current FX, as of today) **+804.02**

1 event(s) excluded from the trade-date-FX total for want of a stored rate.

Organisation & reporting only — NOT tax advice. Gains are in each instrument's native currency; the current-FX base total uses TODAY's FX (approximate — not for filing). The trade-date-FX base total instead values each leg at the FX rate stored when the trade was recorded, and omits any trade lacking a stored rate. Short/long term is a neutral holding-period split at your chosen threshold, not a tax ruling. Verify against your broker records and your jurisdiction's rules.

Risk

Beta (vs SPY)	0.1151
Correlation	0.3276
Downside deviation	2.8
Concentration (HHI)	0.1966

Reporting only, not advice.

Attribution

Headline return **+58.11%**

Asset class	Contribution
Crypto	+20.82%
Equity	+23.44%
ETF	+11.66%
Mutual fund	0.00%

Residual (income, realised, closed positions): +2.20%

Descriptive decomposition — not advice. A single-period, price-based approximation: each holding's contribution is its weight × its return on cost. Income, realised gains, and positions closed during the period are not attributed per-holding; they are surfaced together as an explicit residual, so the contributions plus the residual equal the total return exactly (nothing is dropped). Multi-period (Brinson) attribution is deferred.
